

Quality Improvement Coordinator

West Reading, PA

The Reading Hospital and Medical Center is currently seeking a Quality Improvement Coordinator to join our team.

The Quality Improvement Coordinator will facilitate and support quality improvement efforts and regulatory requirements among the medical staff and hospital departments through data collection, aggregation, analysis and reporting. The Quality Improvement Coordinator will use CQI tools and techniques to monitor processes and outcomes. Analysis will be provided to the appropriate staff to assist in identifying opportunities for improvement. This individual will also act as a resource for the medical and hospital staff regarding the continuous quality improvement (CQI) process.

Requirements for this challenging and exciting position include:

- PA RN License
- BS in Nursing or related field preferred
- 3 years clinical experience
- Prior experience as an Emergency Department RN
- Certification from a national association in quality improvement required as per timeline established by Director at time of offer
- Excellent communication and relationship-building skills
- Ability to critically analyze data
- Experience in facilitating process and quality improvement activities
- Strong working knowledge of the Microsoft Office Suite products
